Subject: USSS documents

In addition to the documents on the data disks, the Service is reviewing the Abraham Bolden file, which the Board has designated an assassination record. The Bolden file is 1,281 pages (8 file folders). Also, at the April meeting, the Board designated an additional 163 pages of material: two more PRI files and Agreements with the FBI. Some of this material is also ready to be placed in the gray boxes at NARA (John Machado just brought these files on May 23, 1997). Last week, John also stamped open one gray archives box of Warren Commission records at NARA so that is now open to the public. We gave John 43 thick documents from OMB with USSS equities for the Service to stamp open. A total of 172 pages of USSS records will be considered at the next Board meeting (a PRI file and additional protective memos). At NARA, recently delivered (post-JFK Act) USSS records are contained in 6 gray archives boxes. Also, the USSS newsclippings and newspapers are in 7 large, flat oversized boxes.
