Subject: Various number points for Jack
TO: CHET RHODES/ARRBcc: David Marwell/ARRB From: Joan Zimmerman/ARRB Date: 05/29/97 03:32:33
PMSubject: USSS documentsIn addition to the documents on the data disks, the Service is reviewing the Abraham Bolden file, which the Board has designated an assassination record. The Bolden file is 1,281 pages (8 file folders). Also, at the April meeting, the Board designated an additional 163 pages of material: two more PRI files and Agreements with the FBI. Some of this material is also ready to be placed in the gray boxes at NARA (John Machado just brought these files on May 23, 1997). Last week, John also stamped open one gray archives box of Warren Commission records at NARA so that is now open to the public. We gave John 43 thick documents from OMB with USSS equities for the Service to stamp open. A total of 172 pages of USSS records will be considered at the next Board meeting (a PRI file and additional protective memos).At NARA, recently delivered (post-JFK Act) USSS records are contained in 6 gray archives boxes. Also, the USSS newsclippings and newspapers are in 7 large, flat oversized boxes. To: Chet Rhodes/ARRBcc: David Marwell/ARRB From: Joan Zimmerman/ARRB Date: 05/30/97 11:06:53 AMSubject: USSS equities in HSCA documentsThe Secret Service has stated that NARA referred 800 documents from the HSCA collection. Of those 800 documents, the Secret Service presented 56 documents with requested postponements to the Review Board. The Service returned the remaining documents to NARA for inclusion in the JFK Collection without any requested postponements. With the exception of about 4 documents with agent addresses or social security numbers and another 5 or so documents (one of which contains 413 postponement requests) the Review Board voted to open them in full. Those 5 documents are still under consideration by the Review Board.The Secret Service has not yet appealed any Board decisions.In addition, out of 45 protective surveys for President Kennedy (March-November 1963) designated assassination records by the Review Board, the Service has requested postponements in 12. These are still under consideration. To: Chet Rhodes/ARRBcc: David Marwell/ARRB, Jeremy Gunn/ARRB From: Michelle Combs/ARRB Date: 05/30/97 11:42:47 AMSubject: JFK LibraryStephanie Fawcett of the JFK Library estimates that 20,000-25,000 pages of material have been released which probably would not have been released if the Board had not come into existence. Most of this material is the Cuba stuff from last summer. To: Chet Rhodes/ARRBcc: David Marwell/ARRB From: Joan Zimmerman/ARRB Date: 05/30/97 01:59:18 PMSubject: more USSS informationI have counted approximately 5700 pages of material (plus a cassette tape of an interview with Chief Rowley) transferred to NARA by the Secret Service since January 1996. These records supplement the Service's Official Case File, which was transferred to the Archives in 1979, and they reflect new contributions to the JFK Collection directly from Secret Service files.Highlights include:The
