Subject: RIF Databases

It would be very helpful for me if you could make it a high priority to clean up our RIF databases as follows: (a) delete out-of-date databases; (b) update all current databases; (c) if possible and sensible, add to the icons the date of the most recent update; and (d) make a list of all of the RIF databases. This will help ensure me that I am aware of all of the relevant databases and that I have the most current up-and-running databases on my screen. Please let me know if any of this seems impracticable.
