**Subject:** HSCA and misc.

First, thanks for the dog advice! Carolyn and I feel less alone for getting it...Second, Jeremy (yesterday) cc'd me on an e-mail about the NONAME meeting, implying (though I'm not certain) that he wanted me to phone in for it (he had asked me to do so for another such meeting that was held while I was in Hawaii), not that I think there's much point in doing so. Then the meeting time (I gather from another e-mail) was shifted or something. Anyway, as you are obviously aware, I was not part of it, which is fine. But did the HSCA stuff come up? Any feedback from Jeremy on "copy and send" vs. "green Board documents" issue? Has Ben started (dare I ask, completed?) the copying, etc.? I finished entering the notes from our hardcopy version of the HSCA-Cross Reference database into the computer, so for the little that's worth, people should now be able to see what's "assigned" to them to review/clear. I'm still willing to do similar entry/computer work for the pages you've been working on since I left. Let me know. Hope all is well, work-wise and otherwise. Give Sue and Grace my best.
