Subject:	FBI computer system
Body:	I had a talk with Deb at the FBI last week in which she indicated that they will be updating the software they use to run the review system (prev known as the RBASE system). The FBI is in the midst of a major computer upgrade in all departments and they are next. This will cause delays in the review process and also will require some changes to the software David wrote to get RIFs from the DBASE system.She is alerting Carol to the problem and is concerned about the impact the changes will have on the system.I will update you as I learn more and asses the impact once the new software is in place.
