Subject: Federal Register Typesetting Codes

Mr. Sowada,I work for the JFK Assassination Records Review Board, an independent federal agency overseeing the declassification of government documents related to the Kennedy assassination. We are required by law to publish monthly in the Federal Register a list of documents on which we have taken action. Currently, this list is sent in WordPerfect format, and you insert a series of codes required for typesetting. I am investigating the feasibility of writing a program which will insert these codes into the version of the list that we send to you, saving the time and expense of converting the file on your end. If possible, I would like a list of these codes so that I can determine if this can be done. In additon, a copy of one of our notices with the codes inserted would be helpful. Please let me know if you are able to assist me in this matter.
