Subject: Word Perfect problem
When users get the message Word Perfect will not initialize, it is caused by a problem with a file in the C:\windows called WPCSET.BIF.This file is copied from e:\notes\wpcset.bif each time the user logs in.the best solution is to first delete WPCSET.BIF in the users E:\notes and c:\windows directoriesuse the salvage command in the users E:\notes directory, go back a few days and restore the WPCSET.BIFthen copy it to the users c:\windows directoryThat should do it.
