**Subject:** Updating information in Fast track RIFs

According to the way I understand how our system is set up, when new disks are loaded into the CIA database, the Fast Track database draws that information and updates the RIF in Fast Track. Is there a way to have Review Track Archive do the same thing? Having the complete data there will accomplish at least two things: first, searches for information about records we have reviewed will be easier and more useful; second, the Final Determination Forms we print will have complete information. Not having complete data has been an inconvenience. When the agency field reads NOT FOUND on the Final Determination Forms we need to manually update that field in all the RIFs. Your help will be appreciated.Thanks.
