Subject: Military Team FDFs

Now that the military team is using Fast Track, they'd like to be able to make FDFs using their own substitute language codes. I've been mucking about in Notes today and figured out the system for making FDFs, so I added a military chart field to the bottom of the FDF form (it's filled in with dummy codes until Jim develops the real ones) in the Review Track Archive Template. However, I'll need to change the RIF form in the Fast Track Template as well to reflect the fact that there is now a military chart in addition to the CIA and FBI ones. I'd also like to make a button to change the FTsublang field, since going into the radio button box to do it bumps the screen to the right and gets kind of annoying. To do all of this, I'll need access to that template (somehow I got access to the Review Track Archive Template and not the Fast Track one). I think I covered all the bases, but if you'd like to check my work or don't want to make any changes to the RIF creator form, let me know. Otherwise, all I need is access to the template and I'm good to go...
