Subject: Hi there.

Okay. I'm going to float an idea and then you can tell me whether it is a cockamamie (sp?) idea or not. I was thinking of including in the chapter some numbers about how often the FBI used particular postponements -- so -- something like, "in a sampling of 150,000 records, the FBI used the "2 &4" postponement [number] of times." That way, we could give the public an overall sense of the percentage of records that we saw that had any one type of postponement. Do you think it even makes sense to do this? If we did it, should we limit our count to the "Core and Related?" Do we even have those types of statistics for any of the HSCA

Body: subjects?Cockamamie idea? (please check one.)YES NO
