**Subject:** Appendices to Final Report  
Aside from listing the depositons, meeting reports, and call reports I highlighted for you on the list of medical exhibits, fthere are many others.Anyone doing this would have to go to two data bases, "Agency Contacts," and the "Public Contacts" database, and either print out, or cut and paste, all meeting reports and call reports. I don't know whether we should list them all, or only those that are "significant." If we do not LIST them all in the final report, we should say so, and indicate where a researcher would go (i.e., to what database) to review them all.Recommend you discuss this with Michelle--show her this e-mail.
