Dr. Schlambaugh is known for asking questions like>this one on his final exam, "Why do airplanes fly?" In May 1997, the>Momentum, Heat and Mass Transfer II Final exam question was: "Is hell>exothermic or endothermic"?>>Support your answer with proof".>>Definitions:> exothermic: Releasing, as opposed to absorbing heat> endothermic: absorbing heat>>Most of the students wrote proofs of their beliefs using Boyle's Laws or>some variant. One student, however, wrote the following:>>First, we postulate that if souls exist, they must have some mass. If they>do, then a mole of souls also must have a mass. So at what rate are souls>moving into hell and at what rate are souls leaving? I think we can safely>assume that once a soul gets to hell it does not leave. Therefore, no souls>are leaving. As for souls entering hell, lets look at the different>religions that exist in the world today. Some of the religions state that>if you are not a member of their religion, you will go to hell. Since>there are more than one of these religions and people do not belong to more>than one religion, we can project that all people and all souls go to hell.>With the birth and death rates what they are, we can expect the number of>souls in hell to increase exponentially. Now, we look at the rate of the>change in the volume in hell. Boyle's
