Subject:	CIA Disks and DOS Docs
Body:	I'm not doing any CIA disks today, so you won't have to come in on Sunday.Irene brought up an interesting issue. State has said that they will no longer provide us with RIF updates. She was wondering if we should go into the database and change the RIF information to reflect changes (specifically, she was thinking of changing the restrictions field from "referred" to "postponed in part", etc.) or if we should just let them go to NARA as is. Also, this means that we will be responsible for creating RIFs for documents that are not on the system when they come in. As it stands, there are about 50 DOS documents that don't have RIFs on Consent & RTA put together. Should we make a concerted effort to fill in that data on the system, or should we focus our efforts on processing what comes in in the future?We can talk more about this on Tuesday.
