Internet RadioThese are homepages for Korean-language radio stations that broadcast on the Internet (One's
in Korea, the other's in LA): www.radiokorea.com www.kbs.co.krThis one lets you click on an icon and hear the
radio (as opposed to the others where you have to hunt around the site for that page). I tried this one out last
night and heard something in a foreign language, so I assume that it works: www.mbc.co.kr/tv_r_live.htm
These are lists of Korean radio stations available on the Internet. I don't know how much overlap there is on
them: www.comfm.com/sites/rdirect/kr.html www.web-radio.com/in_g.html You'll need to download Real
Player. There's a chance it might have come with AOL. If not, your browser will probably detect that you don't
have it and take you to the site where you can download it. If you keep having problems, let me know.
