Subject:	Review Track Printing Problems
Body:	Ben has some NSA documents from Review Track that he'd like to print FDFs for. I put them (and the associated subdocuments) in the Archive and assigned them to the meeting and (after Bob told me) ran the renumber postponements macro on them. In theory, this should produce FDFs that have the information for all the postponements on them. However, while that information appears on the screen, it won't print. I played around with it for a while (my first thought was that "hide when printing" was checked under Text|Paragraph), but couldn't figure it out. If you could either fix it the next time you come in or give me a hint as to what the problem might be, we'd all be a lot happier.Until next time...
