Subject: Endnotes
Body: Some others were having problems printing endnotes. After much testing the problem seems to center around a large endnote that breaks to the next page. This looks like some strange wp61 bug . I wanted to make sure all the text does print and I converted a problem chapter to microsoft word and it printed fine.Tracy: can you give me the name and phone number of the gpo person who will be working on our document. I want to make sure I understand how they will process the files.thanks
