PMSubject: Marty UnderwoodIt turns out that Doug has a copy of the book "The Third Alternative" mentioned in Anne Buttimer's call report. I have started reviewing it and came across a reference to the existence of an FBI file on Underwood. I will ask Laura about this.Eric did not find anything on Underwood at the LOC.I asked the CIA to run a search on his name, but nothing turned up. I did however take a look at the Cubana airlines file with the references to the mysterious passengers and the crypt of the source of the Win Scott information. I wonder if there was ever any follow up questioning of the source? Did you want me to send a request to the Department of Commerce for his file, or is this something Dave Montague is going to handle in making his request to NPRC in St. Louis?Did you want me to follow up with scheduling an interview with Underwood or is somebody else taking care of that?I will probably be at IP on Thursday so unless this is a priority for this week we probably won't have much of a chance to discuss until next week.
