Subject: Re: Call from Joe Backes

Thanks for the heads-up. It is possible, in the Board's discretion, to make available at the meeting copies of the draft text on which they are voting, although given that this is not the final version before the Board votes on it I hesitate to circulate it publicly in an incomplete form. Do you think we should ask the Board to decide if they want to make the text of the regulations (absent the draft supplementary information and other federal register format) available at the hearing itself if we clearly mark it as a draft? We're not precluded from doing so, though its highly unusual.
