**Subject:** Re: The Tracy View in WITH

I need for any leave (sick and annual) to be saved until the end of the pay period. I know the system wipes out the entries at 1:00 a.m., but if we could save the leave entries it would be helpful. I don't know if you can save just certain types, so if not, we could save them all.

I have added a Tracy View in the WITH database. It will keep the read and unread marks just like in Email per your Computer Help desk request. David had also asked that we record this database for your use, can you describe what kind of info we would need to output and how you would like it formatted? thanks
