Subject: Re: Combination lock

I'm not sure what to do about this. I will read the manual to see if it says anything about this. I haven't had any problems, but I don't open the door nearly as much as you. Maybe you could replicate it for me and see if I notice anything?

Subject: Combination lock
This morning it took me approximately fifteen minutes to open the combination lock. The lightning bolt went "on" more than ten times. The numbers then disappeared entirely for about five minutes. Is the lock defective -- or is there more information I should know about it? (This is not a question of my not remembering the combination.)
