Subject: Re: near input form

Chet, don't worry about pulling the format off the back up tape. That really is way to much work for something like this, but thanks anyway. The setup is fine again, I played around with it and finally fixed it. The set up is still in g: drive\wpdocs subdirectory/"input.frm", but I deleted the text from the last near input when I was playing with the format. Case hopefully solved and closed. To: Valerie Trzaska-Sails/ARRBcc: Chet Rhodes/ARRB From: Tracy Shycoff/ARRB Date: 11/17/95 03:54:40 PM Subject: Re: near input form Val, I explained to Chet what happened to the formatting of the input document when you used it from Christina's desk. He would like to recreate what happened, so maybe you can talk to him about it next time you're both in. Chet, you asked to be reminded to pull up the last correct version of the document off the back-up tapes to restore the proper format. The last time it was used was October 30. However, it was on the system in the correct format until it was reaccessed on November 15. I thought that the document was on the g: drive \wpdocs subdirectory and named "input.frm" but when I just went into that document the text wasn't there. Maybe Val moved it after the problems she had to another document. Val, any clue? Thanks.
