Subject: Re: final determination forms

Body: I think it is due to a change I made to the RIF after that meeting. The solution is to open the document go into the edit mode and then save it.That will convert the document to the new format.If it is more than 15 or so documents I can run a macro overnight that will do the conversion. I just could not run it from here due to the phone connection.I will check in with you when I can to check on this.
