Subject:	Re: consent release database
Body:	I would like to handle them consistently with the way we have been handling such documents from the HSCA. We would list them (in cheap paragraph form rather than expensive column form) at then end of the Notice. Any dissenters?To:David Marwell/ARRB, Jeremy Gunn/ARRBcc:Kevin Tiernan/ARRB From:Phil Golrick/ARRB Date:02/06/96 08:37:58 AMSubject:consent release databaseDo we wish to treat as "consent releases" all previously postponed/referred documents that the FBI has opened in full (e.g., pursuant to the authorization of a third agency to which the document had been referred, without ARRB involvement) since we last updated our FBI database? If so, should Chet prepare a program to identify these documents and put them in the consent release database? Also, what should we enter as the "consent date" for such releases?Last week we received updated disks from the FBI.
