**Subject:** Re: FYI. HSCA/NARA computer tapes, re: autopsy material and Z-film

David Kepley of NARA was checking into reading the data for me & I followed up with him a couple of times, but have not received a formal response...Part of the issue is that NARA's inventory they did for us shows 7 digital data tapes, however documentation from Dr. Donald Janney (formerly of Los Alamos), sent a letter to the HSCA...This letter said that he knew the HSCA would be dissolved by the time Los Alamos finished preparing the tapes (approximately 40 of them) & he wanted to send the remaining tapes directly to NARA...I asked Kepley about any other tapes besides the 7 known to exist & he didn't find any record of such additional tapes...I remember that he wondered if it was possible to aggregate the 40 tapes into 7...I don't know if compression programs existed during that time & have never seen the tapes, but if it'll help with the Kodak project I'm all for going up to NARA & inspectingthem...Dave To: Jeremy Gunn/ARRBcc: David Marwell/ARRB, Dave Montague/ARRB From: Joseph Freeman/ARRB Date: 08/05/96 02:34:43 PMSubject: FYI. HSCA/NARA computer tapes, re: autopsy material and Z-filmFYI only. I know probably everyone but me has retained a clear recollection of this matter, but in looking over some Center for Legislative Archives material for other reasons I saw the 2/4/92 memo which Mike Gillette forwarded to Louis Stokes, re: 42 reels HSCA of magnetic computer tapes containing enhanced images of autopsy photos, Z-film, other assassination films/photos, etc. This is the stuff stored at NARA, but which NARA has no ability to "read".I've given a copy of this memo to Doug, who has not seen it previously, just in case it should prove useful down the line (with Kodak, for instance).
