Subject:	Re: The document with a large number of postponements
Body:	Should work now, you need to use the macro under printing called large printing blocking macro (or something like that)Assign the block numbers to the postponement details 20-25 max. Use 20 for this one. Do not assign any block id numbers to the first 20 postponements the start with 1.Let me know how it works out.To:Chet Rhodes/ARRBcc:Mary McAuliffe/ARRB From:Bob Skwirot/ARRB Date:09/06/96 02:22:09 PMSubject:The document with a large number of postponementswhich we discussed this morning is 104-10062-10005. Your mission, should you choose to accept it, is to get the postponements to show in the RIF summary. Good luck. And be careful.
