DeliveryReport: Subject: NSA docs
ReturnReceipt: At some point either today or Friday morning, the three of us should sit down and do a brief review of each of the 87 individual documents to be sure that our recommendations are consistent with established board guidance, if there is any. I do not have the background required to make that determination myself at this stage. Can we do this? The earlier the better, because if there are changes to be made, they will need to be inputted. Thanks, gentlemen.
