PMSubject: Referral to FBI of records from Secret Service Nagell file  
This afternoon I spoke with Deb Beatty about these referrals (specifically, the ones identified in John Machado's letter to us dated December 3, 1996). Deb said that she has already reviewed these records and approved each of them for release in full, as far as FBI equities are concerned (one of the referred reports is a Secret Service document setting out information obtained from the FBI). However, she has yet to write back to Machado to advise him of such. She said that she expects to get a written response out to Machado this week.
