As you can see from the samples I've taken from his book, UNNATURAL DEATH: CONFESSIONS OF A MEDICAL EXAMINER (Random House, 1989), Baden -- formerly Head of the House Select Committee on Assassinations Medical Panel -- went far beyond making the usual misleading statements. He must have had great faith in Allen Dulles's comment: But nobody reads. Don't believe people read in this county. There will be a few professors that will read the record...the public will read very little. To those involved in what the CIA calls perception management, reality seems to be just a rough draft. If people like Baden feel free to lie about what is on public record, imagine the reliability of information they provide that can't be verified. THE HARPER FRAGMENT The fourth [fragment]... was found a few days after the autopsy by a premed student... He took it home to his father, a doctor, who knew what it was and had it photographed. At a party, the photographer couldn't resist talking about it, and the story got back to the FBI. Agents swooped down on the premed student, who was saving the fragment as a souvenir. [P.17](1) According to FBI documents found by Dr. Josiah Thompson, the Harpers behaved quite responsibly. Billy Harper took the fragment to his uncle, Dr. Jack Harper who quickly took it to Methodist Hospital where it was examined by the chief pathologist, A.B. Cairns, and photographed. On the following Monday, 11/25/64, Dr. Harper turned the fragment over to the FBI. [7 HSCA 24] The FBI retrieved photos of Record
