Subject: ONIAs you will note when you read the fax that just came in from Terri Pike, ONI has completed their review and we have a facsimile copy of their official compliance statement. (The official copy is being processed at the moment.) We should be receiving a number of records from them in the next few days (these are the ones Doug, Joe and I saw at our 21 April meeting) as well. I think once all the records and their compliance statement are delivered to us, our work with ONI can be wrapped up. (This is, of course, providing that their continuing search of the remaining 950 cubic feet does nto turn up something they feel they should call to our attention.) Pike, Doolittle and their team have been very impressive, and there is every reason to believe that their search was comprehensive and thorough. The only issue left to be settled is making sure that ONI RIFs the documents before they deliver them to us. (I will take care of that issue.)
