**Subject:** Re: Call II From Glenn's Office

Tom, here's what I found out. 1. Dave gave it to David to watch at home (in the event you did not know, David has the equipment to view this format.) 2. Hanager and Associates has the conversion capability and here is the price list: 15 minutes of footage = \$40 30 minutes = \$60 60 minutes = \$100 90 minutes = \$140. I will ask David tomorrow if he has had a chance to watch it. To: Eileen Sullivan/ARRBcc: From: Tom Samoluk/ARRB Date: 05/12/97 03:53:22 PM Subject: Call II From Glenn's Office

Sebatian O'Kelly from Senator Glenn's Office called again about the infamous British assassination videotape. He was looking for an update. I told him that we were having trouble getting the tape dubbed to US format. O'Kelly suggested (albeit late in the process, folks) that we call Brian Jones, 224-1278, of the Radio/TV Gallery for the Senate Democratic Policy Committee. He can give us the telephone number for Hanager and Associates in Arlington, VA. Apparently, they have the capabilities to go from British to US video format. When you have time please check with Jones to see if he has the number for the place in Arlington or you could just see if they are listed in the phone book. Let's see if they can tell us how much it would cost to dub a copy. I doubt this is going to be an important tape, but since he called us again, let's take it one more step. If Hanager does not do it, then we do not have to pursue any further, unless Dave Montague came up with a place to do it cheaply. Please let me know. If we cannot get it done, we should just simply send the tape back to O'Kelly. Thanks. To: Eileen Sullivan/ARRBcc: From: Tom Samoluk/ARRB Date: 04/14/97 02:12:30 PM Subject: Call From Glenn's Office

E-Sebatian O'Kelly from Senator Glenn's Office called me about a videotape on the RFK assassination that he wanted to share with us. It is apparently from England and has some remote references to the JFK assassination. I told him to send it to your attention. We have to return it after viewing it. It is most likely of no relevance to our work, but I had to say we would look at it because Brian Dettelbach, from Glenn's staff, is helping us on the extension and he is the one who suggested that O'Kelly call me. So, you should look for the tape in the mail soon. One problem with viewing the tape: apparently, it is on some code or VHS format used in England. As a result, O'Kelly said that to play it on a VCR, a copy would have to be dubbed. Once you receive the tape, I thought you could ask Dave Montague to talk to his contacts at the Archives to see if they have the capabilities to go from this British format to our VHS format. I had never heard of this format difference so I cannot give you more information. Another possibility, if it wasn't too much money, is to ask the private vendor who dubbed the Veazey and Powers tapes how much it would cost us to convert a tape from "British format" to "US format." If it is too much, we just have to tell O'Kelly it was too expensive to copy. I'd say don't bother with any of this, except I know O'Kelly is going to ask me what we thought of the tape and if I said we didn't watch it or try to get it
