Subject: Re: HSCA/IRS Records

I thought of another possibility since our call, though it's a long shot. You may want to check the federal register notices for the meetings on both sides (temporally) of the one cited in the consent release cover sheet you read to me. Every once in a while, either by human error or some computer glitch, a record voted on by the Board wouldn't show up on the Federal Register print out for that meeting. In a case like that, if the error wasn't caught before the register notice was published (and rather than publish a correction) we might just bump it to the next register notice. As I say, this is a long shot, though. In all likelihood, I just screwed up in some way we can't easily reconstruct at this point. And, as I say, it's now likely I'll be in D.C. for at least a day or two next week on personal business and can stop by and look at the records in question, if you'd like.
