**Body:** On the win95 machines your WP info is not updated unless you press the update icon on the screen.(it possible you do not have it on your screen, it looks like a rabbit running....)this is due to some limits in 95 and using WP 6.1 which is really for Win 3.1If you do not have that Icon let me know and I will add it.To:Chet Rhodes/ARRBcc:From:Jeremy Gunn/ARRB Date:11/12/97 07:32:14 AMSubject:WordPerfectI made several changes to my QuickList yesterday. They were all gone this morning. What's up?
