There seem to be no major problems, one minor one is that the location of the file at the end of the document ends up in all caps, but this can be overridden manually, of course. For example: e:cathy\corresp\tilley.mmo ends up as E:\CATHY\CORRESP\TILLEY.MMO. I don't know if that make s a major difference to you, though. Pete is aware of this and was unable to devise a way within the macro to change that flaw. His current project is attempting to computerize the federal register!?!Cathy |
