Subject: Re: Update, as of 1/7/98

Body: FYI To: Tom_Samoluk @ jfk-arrrb.govcc: Tom Samoluk/ARRB)From: David S. Lifton @ compuserve.com @
recstat: INTERNET @ INTERLIANT Date: 01/08/98 03:01:16 AMSubject: Update, as of 1/7/98RE: Update1/7/98To:
DeliveryPriority: Tom SamolukFrom: David S. LiftonA brief update:1. The company Smith and Larsen has called and told me
DeliveryReport: they can fix therecorder (for playback purposes) for about \$100. Some parts are on order.When I pick up the
ReturnReceipt: machine, I'll bring a test tape, and see how it works.2. BACKUP PLAN: Pat Valentino has explained to me that---
Categories: using a rentedreel-to-reel deck---he can transfer over my 1-7/8 material at "2X" (i.e.,at twice speed); and then,
after the "audio cleanup" which is part of thejob, transfer it back to the Digital Audio Tape (DAT) format at
"1/2speed", resulting in a perfectly readabe tape on the DAT.So one way or the other, I think this problem will
be solved. I willreport back as soon as Smith and Larsen calls me and I can personally testthe recorder they
claim they are able to fix. We'll then know whether thefixed machine can be used, or whether we have to go
the "rented deck"route.Sincerely,David Lifton
