Subject: Re: Consent Access

Thanks...It's done. But while I have you, Jim has some RIF disks to put into the military database (including some disks that have already been put in but have had some changes made to the RIFs). He'd like to start Review Track processing on them ASAP, but they need to be in the system. Am I able to do anything about this? Should I process them like I do the CIA disks, or is it a completely different procedure? Let me know what I can do on this...One more thing. I'm assuming that we're charged for outgoing email just like incoming email. Is this true? Jeremy mentioned the issue of large incoming emails at the staff meeting on Tuesday, but I don't think anyone would necessarily know that the same is true for outgoing email (if that's actually true). I just wanted to double check before sending a message to everybody about this. Later...
