Subject:	Re: Final Report Formatting - The Template
Body:	I do not have Windows 95.To:ALLcc: From:Peter Voth/ARRBDate:06/29/98 02:27:27 PMSubject:Final Report Formatting - The TemplateTo use the final report template, just detatch the following attachment into c:\office\wpwin\templateWhen you want to create a document using the template, hit Ctrl+T and select the Final Report Template from the menu. Unfortunately, this will not reformat old documents, but let me know if you want to do this; I have some shortcuts to help you. Also, if you do not have Windows95, you probably do not have the proper font. Again, let me know and I'll take care of it.
