Subject: Russian docs  
Eileen asked me to e-mail you the following information. She spoke with the producer at Associated Television who is doing a documentary for TNT. They were in Dallas last week conducting laser trajectory tests as a result of some Russian documents/contacts that they had. They will be going to Russia next week to talk with their contacts that they made through the testing information that they had. They hope to get documents while they are there. They also offered to trade any documents that they get for a set of our medical depositions. (I don't see a problem with doing that if you want to go ahead with it.) Eileen will be talking with them again on Tuesday and should have more information for you then.
