

MEMORANDUM

September 10, 1996

FOR THE FILES

From: Robert J. Skwirot

Subject: Preparation of July 10, 1996 Documents.

The following documents required special handling in the final preparation for transfer to NARA for the reasons indicated:

104-10006-10251 Compared to the version which was sent for review, CIA reversed pages 2 and 3 in the document they prepared for NARA. We returned the pages to the order in which they were originally sent to us.

104-10012-10022 CIA sent two copies of this document. We detached the second.

104-10048-10438 Compared to the version which was sent for review, CIA put the pages in a different order. We sent the document to NARA with the pages following the sequence in which we originally saw it.

104-10018-10083 This document will be noticed as a technical correction. The determination summary directs postponement of the same item in five separate locations but treats it in one postponement detail. It was noticed as having 1 release and 1 postponements; it should be 5 releases and 5 postponements.

104-10050-10076 This document will be noticed as a technical correction. The determination summary directs postponement of three items under redaction #3. They should be treated as separate postponements. Therefore the action on this document should not be 15 releases and 4 postponements as was originally noticed, but 15 releases and 6 postponements.

104-10015-10148 ELMARD is a releasable psuedo(1-8, 1-16, 2-4, 3-7 & 3-11).
