

MEMORANDUM

October 17, 1995

To: Mary McAuliffe

From: Robert J. Skwirot

Subject: Bi-weekly Report

During the past two weeks I have engaged in a variety of projects which relate to document processing, review of documents, and background research. They include:

Document processing:

- preparing Oswald boxes 1-3 for transfer to CIA. This includes identifying and listing "RIF" documents in these boxes and making copies of documents which had been addressed by the Board at previous meetings.
- processing the "RIF" documents from boxes 1-3 which CIA returned to us for the upcoming Board meeting and producing a list of those documents.
- checking State Department documents which were transferred earlier this year.
- visit to CIA to pick up documents.

Review:

- re-review of leftover documents from previous Board meetings.
- preparation for upcoming Board meeting.

MKULTRA background research with Manuel:

- visits to library of Congress and National Security Archives.
- research drawing on secondary sources, on testimony before the Board, and on a number of Senate hearings: Kennedy, Church, and Inouye.
- beginning to draft a memo of findings and recommendations concerning the relevance of MKULTRA to the assassination story.
