

Board Determination on Internal U.S. Army Referral

At its February 17, 1996 Board Meeting, the Review Board voted to release in full, with the exception of social security numbers (which shall be postponed until the year 2017), Department of the Army Inspector General equities present in a 1, 216 page referral received from the Army's Investigative Records Repository (IRR). The referral pages are part of the overall IRR case file on Richard Case Nagell, which consists of approximately 1, 517 pages. Once the complete case file is processed by IRR, document numbers will be assigned on the RIFs created by IRR; but at the present time, the action reported was taken on a subset of a larger file, not yet identified by number, referred internally within the Army.
