Mr. Steven D. Tilley
Chief, JFK Liaison and FOIA Branch
National Archives and Records Administration
8601 Adelphi Road
College Park, Maryland 20740-6001

Dear Mr. Tilley:

This letter documents the transfer of the following two records to the JFK Collection at NARA:

(1) A three volume history titled "The Joint Chiefs of Staff and the Vietnam War, 1960-1968." Due to time and resource constraints within DOD, and the voluminous nature of this material, Executive Director Jeremy Gunn proposed that it be placed into the JFK Collection in its current state, with a very limited number of excisions under FOIA standards, and without declassification review in accordance with the JFK Act--and the Review Board accepted his proposal. The FOIA review was reportedly conducted circa 1986 by OSD, the Joint Staff, and the CIA. The advantage to researchers is that this document will now be available to the public at NARA without each researcher having to file a FOIA request with the OSD history office.

(2) Two identical copies of the Eastman Kodak Technical Report on its work with President Kennedy's autopsy images in November 1997 (Kodak Accession number 317089P), and three original logbooks used at Rochester by the lab technicians and others who had a need to record direct observations and procedures during that work. In many cases, the report refers to log book entries. The log book serial numbers are BB7851; BB 7856; and BB 7857. [The separation in log book serial numbers does **not** mean that there are any log books missing; they were simply pulled out of a supply cabinet in random order.] The original technical report is in the Kodak archive in Rochester.

Mr. Steven D. Tilley
