

April 7, 2017

Mr. Francis X. O'Neill, Jr.  
213 Crosswoods Road  
Branford, Connecticut 06045

Dear Mr. O'Neill:

This is to confirm our telephone conversation of this date, in which I extended to you ARRB's invitation to come to Washington, D.C. to testify in regard to your recollection of events at President Kennedy's autopsy on November 22, 1963, and subsequent events related to the investigation of President Kennedy's assassination. I enjoyed talking with you, and I very much appreciated your cooperation.

We have arranged for your deposition to be conducted at Archives II (the new facility where the JFK Records Collection is located) in College Park, Maryland at 1:30 P.M. on Friday, September 12, 1997.

We will be arranging air transportation for you to travel to Washington on September 11, 1997, and to return to Florida on the evening of September 12, 1997. We will be arranging a reservation for commercial accommodation in Washington, and obtaining airline reservations for your air travel in the near future; I will mail you your airplane tickets and travel orders via Federal Express prior to your deposition date.

Please conduct a search of your personal records and be prepared to bring with you any copies you have of the FD-302 reports you prepared regarding the autopsy on President Kennedy, as well as your subsequent interviews of Secret Service Agents Kellerman, Greer, and SAIC Behn. In addition, we ask that you bring with you any FBI teletype messages, AIRTELS, or internal memoranda you may have copies of that are related to the FBI's investigation of the assassination in any way. If you still possess any of the handwritten, contemporaneous notes you took at the autopsy, or during subsequent investigation, we would be very interested in seeing those materials. (Recently another FBI agent provided his original handwritten notes, taken during Oswald's interrogation in Dallas, to the Review Board, for which we were most appreciative.) Additionally, should you have any diary or personal journal entries from those years which recorded contemporaneous notes, facts or opinions concerning the assassination, we would very much appreciate your bringing those with you for our examination.

Mr. Francis X. O'Neill, Jr.

Finally, if you possess notes, audiotape recordings, or videotape recordings of any interviews which you may have given to independent researchers, or media people over the years, we ask that you bring those materials with you also.

I have enclosed a copy of our enabling legislation for your convenience. Should you have any questions, please call me collect at (202) 724-0088. I look forward to speaking with you again next week to make final travel arrangements.

Sincerely,

Doug Horne  
Chief Analyst for Military Records

Enclosure
