

*What an additional year would buy:*

Completion of the Review of Assassination Records (except Sequestered Collections)

Additional time will allow for the completion of the following entities: DOJ, NSA, INS, NARA, IRS, Secret Service, House and Senate Committees.

“Completion” of the Sequestered Collections of the FBI and CIA

A complete word-for-word review of these collection will not be possible even with an additional year. We will, however, be able to accomplish a thorough evaluation of the content of the collections and will be able to review all of the most important records.

More confidence that a sufficient search has been made for additional relevant records

A by-product of our compliance assurance program is the identification of likely additional assassination records. An additional year will permit an appropriate follow up.
