

### **New Orleans**

You have all received the draft of a letter to Bill Wessel. We would like to get this to him early next week. Please let us have your comments.

### **Dallas**

You know from Jack's report that there are still some unresolved issues with the Sixth Floor Museum. We are waiting for a copy of their collection inventory in order to determine where the potential conflicts might be. The staff will then present to the Board a specific plan for our dealings with the Museum.

### **CIA**

It appears as though there will be no CIA appeal.

### **FBI**

The latest from the FBI: Director Freeh has "signed off" on the appeal. We have not, however received a copy. It appears as though the FBI is still coordinating with the State Department on fine-tuning some of the issues. We will meet with State on Monday (perhaps with the FBI) and hope that there is final resolution early next week.

### **Senate Intelligence Committee**

Jeremy and I had a lengthy conversation with Mark Heilbrun of the Senate Intelligence Committee Staff. Following the meeting with Senator Specter at the CIA two weeks ago, Mark was been assigned the "JFK Records Portfolio" for the Committee and came by to familiarize himself with our operation, concerns, and objectives. He expressed a deep interest in our search for additional records at the CIA and will, I believe, be extremely supportive.

### **Miscellaneous**

Joan and Doug interviewed Robert Bouck, formerly of the Secret Service, on Tuesday.
