

MEMORANDUM FOR RECORD

January 27, 1995

From: Gene Burpoe

*Discussed Newman's extensive file on the Assassination. It was information that was copied from open source information released by the agencies and the Archives. He has excellent files which would enhance our efforts tremendously. He has a comprehensive study that would lead the staff/board to analyze and find the missing links to the puzzle. Each facet of the assassination is covered in depth along with a dossier on personalities involved.*
