

Designation of Certain HSCA Records as "Assassination Records"

July 10, 1996

The President John F. Kennedy Assassination Records Collection Act of 1992, 44 U.S.C. § 2107 (Supp. V 1994), provides that "assassination records" include records that were "made available for use by, obtained by, or otherwise came into the possession of," *inter alia*, the House Select Committee on Assassinations. Although the Review Board does not need to designate such records as "assassination records" in order for them to be processed under the Act, from time to time the Review Board will specify that certain records are "assassination records" in order to clarify any possible misunderstanding regarding their status.

In accordance with this policy, the Review Board hereby designates the following records that were created in conjunction with the HSCA's review of Secret Service files (as more fully identified by the originals to which they refer) as "assassination records":

1. **Memorandum-Secret Service Protective Cases**
