Gary L. Aguilar, M.D.
909 Hyde Street, # 530
San Francisco, California 94109

Dear Gary:

Thank you for your letter of April 17, 1997. I previously have reviewed the contents of CE 2011 with some of the same types of questions that you have raised.

Your quotation from the FBI airtel dated June 20, 1964 was an interesting one. (By the way, you did not enclose a copy of the airtel, but rather another document. Because I am not sure whether you have a copy of the airtel, I am enclosing a copy herewith.) My own review of the airtel from SAC, Dallas to FBI Director Hoover suggests that the information corroborates, to some extent, the statements in CE 2011 that neither Tomlinson nor Wright could "positively identify" bullet C1 as the same one they sighted on November 22, 1963.

What remains unexplained is why CE 2011 makes seemingly contradictory statements about each man's recollection (highlighted in yellow in the enclosed copy of CE 2011) of C1 which state that in a general way, it "appears to be the same (Tomlinson)," and "looks like the slug found (Wright)." Like you, I wondered whether there might be some other FBI report from Dallas linked to interviewing agent Barnwell D. Odum which might explain the characterizations highlighted in yellow on the enclosed copy of CE 2011.

Accordingly, we searched our computer FBI database under the name of Barnwell Odum, and located RIFs for 20 documents associated with his name. Based on the descriptions on the RIFs, none of them pertain to his interviews of Tomlinson and Wright.

If you are aware of any evidence that there is another report (other than the June 20, 1964 telex) which discusses or characterizes the June 12, 1964 interviews of Tomlinson and Wright by Odum, please let me know. At the present time, I also am at a loss to explain the statements highlighted in yellow on the enclosed copy of CE 2011. There may be a document which explains the mixed characterizations of these witnesses' recollections in CE 2011, and then again there may not be; the possibility exists that the peculiar wording in CE 2011 may have resulted from discussions between

Dr. Gary L. Aguilar

the document's author, and SA Odum, and may not be traceable back to any written record.

If you are able to provide any evidence that such a document or interview report exists, we would very much like to know what that evidence is so that we can pursue locating and releasing that record.

Sincerely,

T. Jeremy Gunn

General Counsel and

Associate Director for Research and Analysis
