Subject: References to Hospital Commitment in Dinneen Threat Sheets

Of the 413 threat sheets compiled by HSCA researcher Eileen Dinneen, approximately 115 contain a reference to commitment to a hospital or residence in "a home." None of the sheets contains the name of a doctor or member of the mental health community. Additional sheets which included an assessment of an individual's mental condition by a Secret Service agent were not included. A few sheets contained a reference to a diagnosis but did not include any mention of a doctor or of a commitment to a hospital. Because the source of the diagnosis was not listed on the sheet, those documents are not counted in the 115 sheets.

The following 115 individual sheets include a reference to commitment:

2
5
6 [reference to doctor's opinion]
11
35 [in a home]
38
50 [reference to mental treatment]
