Subject: Unidentified "Priority One" Telephone Log

Among the records of the House Select Committee on Assassinations is a one box series of records (approximately 475 pages) entitled *Unidentified "Priority One" Telephone Log*. When the JFK Collection opened in August of 1993, the National Archives decided to not make these records available to researchers. But because they were unsure of where to refer the documents for third-agency equities, the records remain postponed-in-full. The documents appear to have been prepared by employees of the telephone company, and they do not contain classification markings of any kind. We have been unable to find any correspondence or contact reports regarding the documents in the HSCA files.

I have attached some examples from these records for your review. The Review Board will presumably release these documents in full, unless you can provide some reason that we should take a more conservative approach. If these documents strike you as sensitive in any way, please contact us before March 1, 1998. Otherwise we plan to ask the Review Board to vote on these records at their March 10, 1998 meeting.

Attachments included.
