Re: Federal Government Leads

As we discussed yesterday, some of the comments on the Board's proposed interpretive regulations contain specific suggestions as to the nature or location of particular records or types of records that may constitute assassination records. In this regard, I call to your attention the attached comments, which contain such suggestions respecting the federal government. They comprise:

- 1) The comments of W. Anthony Marsh, containing several specific suggestions as to acoustical evidence and analysis, principally directed at work done by or for the HSCA.
- 2) The comments of Michael J. Ravnitzky, containing a suggestion regarding photoreconnaissance satellite coverage of the area surrounding the assassination.
- 3) The comments of Bill Adams, containing suggestions as to, inter alia, specific threats against JFK and the November 1963 burglary of the National Guard Armory in Terrell, Texas.

4) The comments of Joseph Backes,¹ containing suggestions as to Justice Department and other documents pertaining to passage of Public Law 89-318, vesting title to items of physical evidence in the federal government. Mr. Backes also has submitted a copy of a "List of Documents That the National Archives Has Been Unable to Locate in the Records of the Warren Commission," which apparently contains updates not in the version of this list published in National Archives--Security Classification Problems Involving Warren Commission Files and Other Records, Hearing Before a Subcommittee [on Government Information and Individual Rights] of the House Government Operations Committee, 94th Cong., 1st Sess., Nov. 11, 1975.

5) The comments of Peter Dale Scott, containing several specific suggestions regarding FBI, DEA/FBN, and CIA records.
